

Challenge week 3

☰ Tags

2.1 Warm up

a)

1. define variable a and b to 4443423434 and 439439439 respectively
2. return (a + b)

2.2 Practice

just did it in js instead of psudo. Hope that's ok!

```
function fahr_to_cel(f) {  
  var fahr = prompt("insert fahrenheit")  
  return (fahr - 32) * (5/9)  
}
```

2.3 Challenge

```
var mEl = document.getElementById("m")  
var cEl = document.getElementById("c")  
var resEl = document.getElementById("res")  
  
var m = parseInt(mEl.innerHTML)  
var c = parseInt(cEl.innerHTML)  
var e = m*c*c  
  
resEl.innerHTML = e
```
